Step 1. Copy files to a directory on you computer.

- Create a file in you're my documents folder called NEW_MHCLS and copy all the files from the CD to that folder.

- Give everyone read permission to the folder.

    o Right click on the folder and select properties.

    o On the properties page select the Security tab.

- o Click Add.

- o In the Enter the object names to select box type "everyone" and press OK.

.

- o Press OK at the Properties page.

Step2. Install Internet Information Services (IIs) and set up a web page.

- Install IIS.

  o Open up the windows control panel and select Add or Remove Programs.

o On the Add or Remove Programs window click on Add/Remove Windows Components.

o   If Internet Information Services is not checked check it and click Next.
    Follow the instructions. You may need to supply your system disk.

- Create Virtual Directory

  o   Once IIs is loaded return to the Control panel and double click on
      Administrative Tools.

  o   In Administrative Tools double click on Internet Services Manager.

  o   Open your site by clicking on the + next to your computer's name.

  o   Open the Web Sites folder the same way.

  o   Right Click on Default Web Site and Select New and then Virtual
      Directory.

o Click Next to start the Virtual Directory Creation Wizard.

o Type mhcls in the Alias: box and click Next

o Click on the Browse button and browse to the location you put the
MHCLS files.

o Click OK.

**Virtual Directory Creation Wizard**
